Don't settle for a cheap after market replacement blade to fit Great Plains Drills. No other after market blades meet or exceed the quality and performance of the disc assemblies offered by Great Plains.

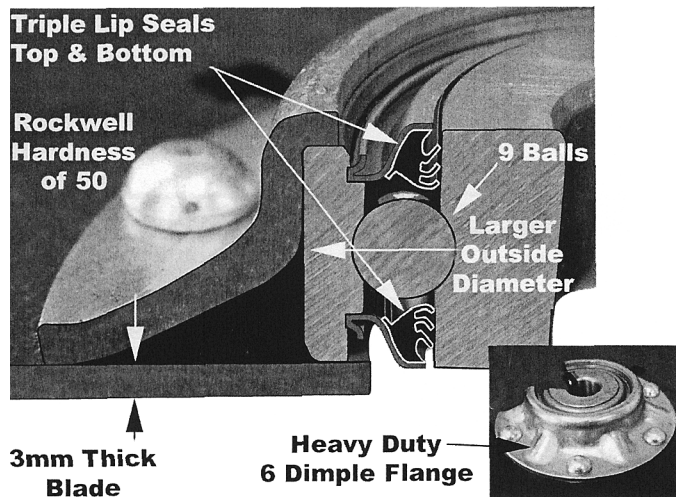

The competition may offer a blade that looks like Great Plains, fits like Great Plains, but it will not perform like Great Plains.

After recent testing on several after market blades for hardness and wear, the Great Plains blade with Boron tested well above the rest. The result in performance over the competition has been as much as 50% longer wear as reported by several who have tried the retrofits.
